Inspiration

STONE | CONCRETE

A dark, minimalist interior space with a wall of circular light openings. The wall is dark and textured, and the floor is also dark. The ceiling is dark. The light from the circular openings creates a pattern of bright circles on the wall and floor. The overall atmosphere is mysterious and artistic.

A space with many possibilities

It is with pride that we present to you an array of universal porcelain tiles inspired by stone and concrete. We are offering you 21 collections which will captivate your senses with their richness of patters, a variety of formats and an abundance of surface finishes to choose from.

Stone inspired surfaces fit into every style and interior and porcelain tiles, which faithfully imitate this natural material, are desired more and more by supporters of elegant and times less spaces decorated with subtle references to the latest trends. Among these stone inspired tiles, you will be able to find collections that faithfully imitate the Statuario marble veining patterns or the beautiful Fior Di Bosco stone found in Italy. These are suggestions for those who are looking for avantgarde solutions worthy of the most luxurious spaces.

Concrete is currently one of the most popular materials being used in interior design. It presents itself equally great in lofts of industrial spaces, as it does in cozy spaces when punctuated with warm accessories. Perpetually adored by minimalists and appreciated by interior designers, it attracts attention, awakens awe, interrupts routine... providing a broad spectrum of design possibilities.

We believe that these collections will help you find those ideal selections, thanks to which your dreams of that perfect interior will finally be fulfilled.
