It is with pride that we present to you an array of universal porcelain tiles inspired by stone and concrete. We are offering you 20 collections which will captivate your senses with their richness of patterns, a variety of formats and an abundance of surface finishes to choose from.

**Stone** inspired surfaces fit into every style and interior and porcelain tiles, which faithfully imitate this natural material, are desired more and more by supporters of elegant and times less spaces decorated with subtle references to the latest trends. Among these stone inspired tiles, you will be able to find collections that faithfully imitate the Statuario marble veining patterns or the beautiful Fior Di Bosco stone found in Italy. These are suggestions for those who are looking for avantgarde solutions worthy of the most luxurious spaces.

**Concrete** is currently one of the most popular materials being used in interior design. It presents itself equally great in lofts of industrial spaces, as it does in cozy spaces when punctuated with warm accessories. Perpetually adored by minimalists and appreciated by interior designers, it attracts attention, awakens awe, interrupts routine... providing a broad spectrum of design possibilities.

We believe that these collections will help you find those ideal selections, thanks to which your dreams of that perfect interior will finally be fulfilled.

# SOFTCEMENT

Fans of minimalistic interiors will greatly enjoy the structure of concrete that inspired the Softcement tile collection. An interesting structure along with patchwork accents, is a mix of several interior design trends, that create an impressive and consistent composition in the collection. The imitation of concrete in three shades of grey, combined with very attractive decor and tiles with 3D-print structure, adds a new and interesting character to any room. The Softcement collection is recommended to customers that would like to capture the energy and harmony of subtle and consistent interiors.
