

Letter of Acknowledgement and Commitment to CTPAT Guidelines and Supply Chain Security

Cerrad, Corp. promotes a culture of security and demonstrates this commitment to supply chain security and the CTPAT Program through this statement of support:

Cerrad Corp. is a business oriented on providing porcelain tiles to its customers throughout the Americas, with an excellent quality-to-price ratio. Its main focus is to build a strong sales network in the USA by offering unique and unparalleled services. One of our key services is to take responsibility for the logistics operations and seamlessly moving our customers' containers to their place of business. With the number of containers being moved by Cerrad Corp every year (650+ TEU estimated for 2022) and its continuous and strong growth year-over-year this became an important aspect of our business model. The undisrupted and secure supply chain became one of the key factors allowing the company to offer best in class transit time, along with on-time delivery and excellent porcelain tiles for our customers to use in the USA market.

Cerrad understands the security risks posed by any in-bound cargo to the United States including importance of protecting the supply chain from criminal activities such as drug trafficking, terrorism, human smuggling, and illegal contraband. Our business has maintained years of certification under the CTPAT program and continues to comply with the program's guidelines and security requirements.

As an active participant in the C-TPAT program, Cerrad has:

- built a robust supply chain security program that incorporates representation from multiple internal company functions into a sustainable cross-functional team. This allows security measures to be integrated within separate functions at a higher level of accountability.
- fostered cooperative relationships with our business partners, importers, carriers, consolidators, licensed customs brokers, and manufacturers that strengthen and improve overall international supply chain security. Cerrad's belief in CTPAT's mission is further demonstrated by our expectations of partner compliance through validation processes including conducting site visits at domestic and foreign locations.

Our business is committed to providing overall security awareness to our employees and training on the above commitments to relevant employees.

Tarasinski Piotr
